About This Game

Through the dense fog our hero noticed a dark silhouette of a dark castle. Eventually his old rain-soaked map brought him to his target. He didn't have anything with him except for his favorite sword and remainings of an old armor with an unusual device – a sword-breaker. The hero looked around and stepped on the castle bridge...

This game is about a hero who, as fate would have it, finds himself in an abandoned castle. There will be many obstacles on his way to the treasure hidden somewhere inside, with most remarkable adversaries he will have to face and mysteries to unravel. All this to receive his well-earned reward in the end!

"Swordbreaker The Game" gives you a rare opportunity to find yourself in interactive fiction, where each player has their own storyline to develop. Every action or decision will have an effect on how the story unfolds and how it all ends. Some moves you make will change your character's karma, and others can lead you to the darkest corners of the castle, so be careful! Because any step you take may turn out to be the last one!

Main features of the game:

- A compelling totally non-linear game story
 - Various endings
 - A huge mysterious castle

-
- Lots of exciting locations and events
 - Impressive enemies and inhabitants of the castle
 - Absolutely stunning artwork
 - Achievement system

one of the best films on stream. Archimedes tries to make you feel like what is going on is real instead of just a game, and I have to give the developers credit for trying something original. But the execution just doesn't do it for me. The conversations you have in the chat window feel very forced: there are no choices (at least none that I encountered) and the writing varies between bad and just OK. The thing that really bothered me was that the game starts asking you to use a real web browser to get information to proceed in the game. I don't know why the decision was made to include something like that, but it seemed intrusive and unpleasant to me.. Amazing, i had heard about this game before and there are no rts left so I thought:

it, lets try it out. Man am i not disappointed.

On this game you play the space marines campaign. You are a kickass dude who believes in some sort of know it all emperor(i think its like god or something like that).

That said, they are fanatics who do everything in the name of the emperor. Its a nice story. The expansions lets you play with other races.

It feels very good, you need to try it.

Graphics arent good for todays standards but get the wide screen fix and the zoom out mod and you are all set. After a while you start loving the graphics.

Its a gem, go buy it.. The maps look great, the 10 supply drops are at lowest value that the game has ever seen, HOWEVER

on PC, nobody really bought the map pack. The dlc playlist is always dead, and the only way you can play the maps online is if one of them comes up in a regular playlist, at which point, if it gets enough votes, half of the lobby will be kicked and the match will quickly go from 6 v6 to 2v2.

if for some insane reason you own a console copy, and a pc copy of MWR, and you only want to buy dlc for one or the other, get it for the console copy. It will be much more playable, and you will have a better chance getting your moneys worth out of it. Otherwise, on PC, you will really only be able to enjoy private bot matches with your \$15 dlc. Amazing game. Nights of Azure 1 was very underwhelming to me but this improved on nearly every aspect, including the waifu factor. The main character is gorgeous and all the characters are extremely well designed and acted. This is probably one of the better Anime style games that I have ever played. If more games were like this game, gaming would be in a better place. The music score is enchanting and simply wonderful. I would rate it just underneath Nier Automata level genius. The game has at times a castlevania style feel which I have been missing ever since Legacy of Darkness for the n64. I'm stoked for more content for this game to come out, I hope I can expect it.. WOW.....it is so boring, your literally just riding there for what seems like forever with nothing barely happening and no music at all, and when things do happen there borderline comical and not scary. i do not recommend at all. Fun game with good content. Mini golf is the best out there.. Just gave Infinite Space III a shot last night and wound up playing several hours. Even in its early release status, the game is fun, and the variations thrown by the RNG keep even the (somewhat small) range of encounters varied. I have enjoyed the heck out of it so far, and absolutely cannot wait to see what the devs do next.

The slug is, and always will be, the greatest platformer of all time.

. Good concept that needs some work in its execution. It's certainly playable but finicky at times, no matter how many times you mute that damn annoying music it'll play again as soon as you start it back up, and often you either can't get a piece to budge when it's got plenty of room OR it'll go shooting off at lightspeed (especially when you need it carefully placed to remove another piece). These are all relatively minor flaws in a game that stands up pretty well for \$5.99, but until these issues are addressed I would recommend buying it on sale. It also won't last you too long, at just over 90 minutes I'm nearly 40 puzzles in and rapidly approaching the last puzzle. With a little bit more polish, though, this puzzle game could share honors with titles like Zen Bound.. I'm not one for turn based strategy, but this is a game I love despite being being one. The plot is what what kept me interested and playing after facing the annoyance of turn base for the first time. Nice and bright graphics from an era that still put their heart in designing the main menu. The one thing I found frustrating years ago when I play this for the first time was the looped animations. Still, I highly recommend playing it!

If you're looking for something to relax: just put the difficulty on easy, sit back and auto battle your way though.. No idea about the route never touched it, nor will I..

This class 03 is worthy of more than to haul her fallen sistertrains around what is the railbound version of a funeral home

Forget the route.. Its depressing

BUY FOR THE 03!

Cute, surprisingly powerful with lines that speak of an industrial past where these little locos were king.. A required part of docksides, factories and Railyards.

The saddletank of the diesel era

Great for AI scenery crossing lines minding her own buisness hauling any manner of light freight..single full size carriages or a few unfitted coal wagons destined for somewhere

She has 5 gears, shakes in protest if the gears too low.. Makes the perfect moderate pace passenger engine for a branchline..

Nicely ticking engine to a loud thunderous roar and growl of power under acceleration

Horn is a single trumpet note blast

No headlights but cablight works well

Head out view is perect

Slight bug with exhaust though as it never stops even when engines off

All up though its the same engine in the WSR diesels pack just blue

Goes well making up unionist scenarios where its the only traction left on a strike and ends up hauling the 2 car all stations commute train..a favorate of mine in quickdrive

Lovable engine..everyone needs one..

Superior in personality and cab visibility than the gronk. Damn, Blue Revolver is one of the best danmaku games that I've played! It's incredible fun and rewarding. It's a good start for new danmaku players, but at the same time it can be a hellish experience for those who want a challenge.

And the soundtrack? It's so good! It kept me pumped up all the time!. This game reminds me of the superb 'Supreme Commander'.

MAW3 is a real time strategy game featuring over 130 different types of units and technologies, 21 campaign missions with characters and an intriguing story, unlimited random map skirmishes with many customizable settings, network multiplayer to challenge your friends, and so much more in this RTS! - Highly Recommended!. For old-school TRON fans, nothing quite like hopping into a glowy tank, and getting to shoot at other glowy tanks. This game is simple, but fun, and very pretty in a sort of retro way. Love it!. Great game for those who love the thrill of a good grind and the dozens of possibilities from creating your own unique party. With dozens of girls to choose from and tons of growth potential from each character it really can get crazy. My only complaint would hav to be the random crashes that occur from time to time. With that in mind still a great game to play.
